### DETAILED ACTION

1. This application appears to be in compliance with the Sequence Rules.
2. Claims 1 - 43 are pending.
4. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the alkylating agent is selected from group set forth on page 26, paragraph 1 of the instant specification.

These species are distinct because their structures and physicochemical properties differ. Therefore, they are patentably distinct species

Alternatively, applicant is invited to acknowledge that these alkylating agents are obvious in view of one another.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

4. In addition to the election of a species of an alkylating agent, this application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the immunosuppressive composition (see pages 16, 17, 24 comprises:

a first ligand that interferes with binding of CD28 to either CD80 or C86 selected from the following:

- (A) CTLA4,
- (B) CD28,
- (C) B7-1,
- (D) B7-2,
- (E) B7-3,
- (F) anti-B7-1 antibody,
- (G) anti-B7-2 antibody,
- (H) anti-B7-3 antibody,
- (I) anti-CTLA4 antibody, or
- (J) anti-CD28 antibody.

and a second ligand that interferes with binding of CD40 to either CD154 selected from the following

- (A) anti-CD154 antibody or
- (B) CD40

These species are distinct because their structures and physicochemical properties differ. Therefore, they are patentably distinct species

Applicant is required to elect a species of a first ligand and a species of a second ligand.

Art Unit: 1644

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

5. In addition to the election of a species of an alkylating agent and of a species of an immunosuppressive composition, this application contains claims directed to the following patentably distinct species of the claimed invention: wherein the condition targeted is:

- (A) inhibiting rejection of a solid organ transplant,
- (B) beta-thalassemia or
- (C) sickle cell anemia.

These species are distinct because their etiologies, pathologies and therapeutic endpoints differ.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
